Notes on contributors

Laurinda Abreu is Professor of History at the University of Évora, Portugal. Her specialist field is the history of poor relief and health in the Early Modern period. She is Director of the Erasmus Mundus PhD – Phoenix JDP on Dynamics of Health and Welfare. She was the coordinator (2001–09) of the Phoenix TN – European Thematic Network on Health and Social Welfare Policy. She was President (2011–13) of the European Association for the History of Medicine and Health. Her recent publications include: *The Political and Social Dynamics of Poverty, Poor Relief and Health Care in Early-Modern Portugal* (London and New York, Routledge, 2016) and a co-edited book *Hospital Life: Theory and Practice from the Medieval to the Modern* (with S. Sheard, Oxford, Peter Lang, 2013).

Jon Arrizabalaga is Research Professor in History of Science at the Spanish National Research Council (CSIC), Institución Milà i Fontanals (IMF), Barcelona, Spain. His research is mostly focused on medicine, health and disease in Pre-modern Europe; and on biomedical technologies and social movements in the modern world, with particular attention to humanitarian action and war medicine in modern Spain. His most recent publications include 'War, empire, science, progress, humanitarianism. Debate and practice within the international Red Cross movement from 1863 to the interwar period' (*Asclepio*, 2014, 66/1) and the volumes *Nicasio Landa. 'Muertos y heridos', y otros textos* (edited with Guillermo Sánchez, Pamplona, Pamiela, 2016) and '*It All Depends on the Dose*'.

Poisons and Medicines in European History (edited with Ole P. Grell and Andrew Cunningham, London, Routledge, 2017).

Dominique Bon is responsible for the Regional Fund at the Library of Monaco and a PhD student in Anthropology at the University of Nice Sophia Antipolis (LAPCOS – Laboratoire d'Anthropologie et de Psychologie cognitives et sociales). His anthropological research on the notion of contagion is carried out within the framework of an epidemiology of representations. His historical research focuses on sea and land health policies in the Province of Nice, the Sardinian States and the Principality of Monaco in the nineteenth century.

Quim Bonastra is Professor of Human Geography at the University of Lleida where he teaches at the faculty of Education, Psychology and Social Work. He is a member of the Department of Geography and Sociology. He holds a doctorate from the University of Barcelona. Currently his main research interests are in the areas of the geography and history of spaces of control at various scales ranging from the architectural to the territorial, and transdisciplinary education around and through artistic practices. He is a member of the Espai Híbrid collective (www.espaihibrid.udl.cat) and of the editorial team of *Scripta Nova*, a journal of geography and social sciences (<http://revistes.ub.edu/index.php/ScriptaNova/index>).

John Chircop is Associate Professor in Comparative Social and Economic History with the Department of History and Chairperson of the Mediterranean Institute, the University of Malta. He is also a co-founder of the Quarantine Studies Network. His research focuses on public health, medicine, poor relief and vulnerability in the British Mediterranean colonies (Gibraltar, Ionian Islands, Malta and Cyprus) from 1800 to the 1930s. Besides his numerous research papers in academic journals and chapters in books, his recent publications include: *Vulnerability: Social Inequality and Health* (edited with P. Bourdelais, Lisbon, Edições Colibri, 2010) and *Colonial Encounters: Maltese Experiences of British Rule 1800–1970s* (Malta, Horizons, 2015).

Malika Ezzahidi is Professor of History in the Faculty of Arts and Human Sciences, Hassan II University of Casablanca. She holds a doctorate from the Mohammed V University of Rabat. She is an active member of the doctorate programme 'History of the City in the

Mediterranean', as well as of the Laboratory of History and Translation in the same faculty. Her publications include '*Al Bâder Assafir ...*' *Journey to Malta and Naples (1781–1782)* (Beirut, Arab Institute for Studies and Publishing, 2013), '*Le rachat des Captifs musulmans à Malte en 1782 ...*' (*Cahiers de la Méditerranée*, 87, December 2013) and *Diplomatic Personality in the Modern Era. Ibn Othman Al Maknassi as a Model* (Rabat, CCME, 2016).

Juan Carlos García-Reyes is a research manager at Instituto de Salud Carlos III (Madrid, Spain). He was a research fellow JAE-CSIC at the Institution Milà i Fontanals (CSIC, Barcelona, 2008–13). After taking his MA in the History of Science at the Universitat Autònoma de Barcelona (2009), he is now working on a PhD thesis on the origins and early history of the Spanish Red Cross.

Angelos Hatzakis is Professor of Epidemiology and Preventive Medicine, in the Medical School of the National & Kapodistrian University of Athens, Greece. He is founder of the National Retrovirus Reference Center, Athens, Greece, and former President of the Hellenic Center for Disease Control and Prevention. He is also founder and Co-Chair of the 'Hepatitis B & C Public Policy Association', Luxembourg. He participates in many executive committees in both the private and public sectors. His research interests cover epidemiology, virology, preventive medicine and public health of infectious diseases – especially HIV/AIDS, hepatitis and other oncogenic viruses – with more than 280 international scientific publications and more than 13,000 citations.

Francisco Javier Martínez is FCT Investigator Researcher at the CIDEHUS of the University of Évora, Portugal. His research focuses on the history of medicine, public health and humanitarian relief in contemporary Morocco, especially in relation to Spanish and French colonial interventions. He has also investigated Morocco's scientific modernisation in the nineteenth and twentieth centuries and the life and writings of modern Spanish travellers to the Arab-Islamic world. Recent publications include 'The Pasteur Institutes in the Maghreb during the colonial period' in the journal *Dynamis* (2016); the chapter 'Weak Nation-states and the Limits of Humanitarian Aid: The Case of Morocco's Rif War, 1921–1927' in the volume *Dilemmas of Humanitarian*

Aid in the 20th Century (Oxford, OUP, 2016) and the biography *Viajes por Marruecos de Joaquín Gatell* (Madrid, Miraguano, 2014).

Effie Poulakou-Rebelakou graduated from the National & Kapodistrian University of Athens Medical School and Greek Literature School (Department of Medieval and Neo-Hellenic Literature). Her current position is Associated Professor of the History of Medicine and Director of the Department of the History of Medicine at the National & Kapodistrian University of Athens Medical School. She is a member of Greek, European and international societies for the history of medicine and Vice-President of the International Society of the History of Medicine.

Christian Promitzer is a Research Fellow at the Institute of History, division for Southeast European History, at the University of Graz. He was head of the multiannual research project 'Infectious Diseases and Public Health in Southeast Europe' focusing mainly on the nineteenth century and on the early twentieth century up to the Balkan Wars. He is also co-editor of the volumes *(Hidden) Minorities between Central Europe and the Balkans* (Berlin-Munster, Lit Verlag, 2009), *Health, Hygiene and Eugenics in Southeastern Europe to 1945* (Budapest and New York, CEU Press, 2011) and of *Southeast European Studies in a Globalizing World* (Berlin-Munster, Lit Verlag, 2015).

Joana Maria Pujadas-Mora is team leader of the area of Historical Demography at the Centre d'Estudis Demogràfics – Universitat Autònoma de Barcelona. She received her PhD in 2009 from the Universitat de les Illes Balears. Part of her dissertation was done at the Spanish National Research Council. From 2011–16 she worked in the Department of Geography of the Universitat Autònoma de Barcelona, as scientific coordinator of the ERC Advanced Grant Project 'Five Centuries of Marriages'. Her research interests are in the field of social history and historical demography. Some of her more recent publications are as follows: 'Bridging the Gap between Historical Demography and Computing: Tools for Computer-assisted Transcription and Analysis of Demographic Sources' (co-authored with A. Fornés, J. Lladós and A. Cabré, *The Future of Historical Demography*, Leuven, Acco, 2016), 'El cólera como conflicto y factor de legitimación, Palma 1865' [Cholera as a factor of conflict and legitimization, Palma, 1865] (with P. Salas,

Ayer, 2016) and 'Reconstructing Lifespans Using Historical Marriage Records of Catalonia from the 16th and 17th Centuries' (with F. Vilavicencio and J.P. Jordà in *Population Reconstruction*, Switzerland, Springer, 2015).

Lisa Rosner is Distinguished Professor of Historical Studies at Stockton University, Galloway, New Jersey, USA. She received an AB from Princeton University and a PhD from Johns Hopkins University. Recent publications include *The Anatomy Murders* (Pennsylvania, University of Pennsylvania Press, 2009) and *Vaccination and Its Critics* (California, ABC-Clio, 2017). She is the recipient of grants and fellowships from the National Endowment for the Humanities, the American Philosophical Society and the Chemical Heritage Foundation.

Pere Salas-Vives is Associate Professor in Modern History in the History Department of the University of the Balearic Islands, where he teaches European Modern History (nineteenth century), World History (twentieth century), and European Population History (eighteenth–twentieth centuries). His main research concerns are on the study of local power, public health and local administration from a historical view. Among his publications are: 'La gestión de la salud pública en tiempo de epidemias: cordones y cuarentenas, medidas obsoletas?' [The Management of Public Health in Times of Epidemics: Cordons and Quarantines, Obsolete Measures?] in E. Perdiguero Gil and J.M. Vidal Hernández, *La ciudadela de los fantasmas. Lazaretos y protección sanitaria en el mundo moderno* (Menorca, Institut Menorquí d'Estudios, 2010); 'Libertad y/o derecho a la vida. El resguardo sanitario durante el primer liberalismo (Mallorca, siglo XIX)' [Freedom and/or right to live. The sanitary defence during the first Liberalism (Mallorca, XIX century)], published in *Historia Social* (2010) and 'El delito de ser miserable. Seguridad pública e higiene en Palma 1852–1868' [The Crime of Being Poor. Public Safety and Hygiene in Palma 1852–1868], in the XIII Congreso de la Asociación de Historia Contemporánea: *La Historia, lost in translation?*, Universidad de Castilla la Mancha (Ediciones Universidad de Castilla la Mancha, 2016).

Eleni Thalassinou graduated from the School of Nursing, at the National & Kapodistrian University of Athens. She has a Master's Degree in Public Health from the School of Nursing of the National &

Kapodistrian University of Athens and a PhD from the Medical School of the same institution. Her PhD was entitled 'Plague an Acute Infectious Disease: Its Epidemiology through History'. She worked for the Hellenic Center for Disease Control and Prevention from 2003 until 2005 and for the National Organization Against Drugs from 2005 to date. She also worked as a Professor's Assistant in the Department of Nursing of the Technological Educational Institute of Western Greece from 2005 until 2008. Her academic interests include epidemiology, infectious diseases and the history of medicine.

Costas Tsiamis is cytologist and researcher at the Department of Microbiology, Medical School, National & Kapodistrian University of Athens, Greece. He has a PhD in Epidemiology (Department of Hygiene, Epidemiology and Medical Statistics, Medical School, National & Kapodistrian University of Athens). He teaches Historical Epidemiology at the Postgraduate Program of Historical Demography (Department of History, Ionian University, Corfu–Greece) and Humanitarian Medicine at the Postgraduate Program of International Medicine – Health Crisis Management (Athens Medical School). The main topics of his medico-historical studies are the history of epidemics and the history of public health during the nineteenth century and the interwar period.
