Notes on contributors

Lucy Barnhouse, Ph.D., is an Assistant Professor at Arkansas State University, USA. Her research focuses on the intersections between legal, religious and medical history in late medieval Germany. Her prospective monograph, *Houses of God, Places for the Sick*, examines the place of hospitals in the religious and social networks of late medieval cities. She has made an edition and translation of leprosy examination letters for the *Medieval Disability Sourcebook*, and has been a podcaster with *Footnoting History*, on topics including women's history and medical history, since 2013.

Elma Brenner, Ph.D., L.M.S., is a Research Development Specialist at Wellcome Collection, London. She is also an associate member of the Centre de recherches archéologiques et historiques anciennes et médiévales at the University of Caen, France (UMR 6273 – CNRS). Her research explores intersections between health and religious culture in medieval France and England. Among her publications are *Memory and Commemoration in Medieval Culture* (co-edited with Meredith Cohen and Mary Franklin-Brown, 2013), *Society and Culture in Medieval Rouen, 911–1300* (co-edited with Leonie V. Hicks, 2013) and *Leprosy and Charity in Medieval Rouen* (2015).

Luke Demaitre, Ph.D., was Visiting Professor at the Center for Biomedical Ethics and Humanities at the University of Virginia, Charlottesville, until 2017. He has written on a range of medical notions, norms and practices in Europe before 1600, and his current study focuses on responses to striking diseases. His major publications include *Leprosy in Premodern Medicine: A Malady of*

the Whole Body (2007) and *Medieval Medicine: The Art of Healing, from Head to Toe* (2013). His most recent publication, ‘Official objectives of the *Visitatio leprosororum*: Ambiguity, ambivalence, and variance’, appeared in *Policing the Urban Environment in Premodern Europe* (2019, open access).

Rafaël Hyacinthe, Ph.D. (Université Paris I, Panthéon-Sorbonne), is currently in charge of the hospitaller archives in the Archives départementales de l’Hérault in Montpellier, France. His research is focused on the Order of Saint Lazarus of Jerusalem, from the Middle Ages up to the modern period. Further studies concern charity in medieval southern Italy (Ecole française de Rome), as well as the cult of Saint Lazarus in the East and the West (Centre national de la recherche scientifique). Along with articles and contributions in edited volumes on the history of the crusades, he has published *L’Ordre de Saint-Lazare de Jérusalem au Moyen Age* (2003).

Damien Jeanne, Ph.D., is a lecturer at the universities of Caen and Le Havre, France. He is an associate member of the Centre de recherches archéologiques et historiques anciennes et médiévales at the University of Caen (UMR 6273 – CNRS). His research addresses the history and place of diseases in western medieval society. He is co-editor of *Purifier, soigner ou guérir? Maladies et lieux religieux de la Méditerranée antique à la Normandie médiévale* (2020). Other recent publications include ‘Lèpre humiliante, lèpre édifiante: Hamon de Savigny, novice réputé lépreux au service des lépreux’, in B. Galbrun and V. Gazeau (eds), *L’Abbaye de Savigny (1112–2012)* (2019); and ‘Bénédiction ou malédiction? Maladies et malades sous le regard des bénédictins (XIe–XIIe siècle)’, in P. Bauduin, G. Combalbert, A. Dubois, B. Garnier and C. Maneuvrier (eds), *Sur les pas de Lanfranc, du Bec à Caen* (2018).

Courtney A. Krolikoski is a Ph.D. candidate at McGill University. Her research explores the status of lepers in Bologna, Italy in the high Middle Ages, with attention to the interaction between contemporary social, political, religious and medical understandings of leprosy. She is one of the founders and organisers of the 2018 conference ‘Leprosy and the “Leper” Reconsidered’, and is co-editing the resulting volume, *Leprosy from the Medieval to the Modern World: A Global Interdisciplinary Approach*.

Anna M. Peterson, Ph.D., is an early-career researcher who currently focuses on corruption and accountability in medieval hospitals and *leprosaria*, particularly in the south-west Mediterranean. She recently completed a Mellon Fellowship at the Pontifical Institute of Mediaeval Studies, Toronto, studying this topic through the lens of Church reforms. She is also one of the founders and organisers of the 2018 conference ‘Leprosy and the “Leper” Reconsidered’, and is co-editing the resulting volume, *Leprosy from the Medieval to the Modern World: A Global Interdisciplinary Approach*. She received her Ph.D. from the University of St Andrews in 2017 for ‘A comparative study of the hospitals and leprosaria in Narbonne, France and Siena, Italy (1080–1348)’.

Carole Rawcliffe, Ph.D., is Professor Emerita of Medieval History at the University of East Anglia, UK. Her many publications focus upon hospitals, public health, responses to disease, and the interconnection between religion and medicine from the eleventh to the sixteenth century. They include *Medicine and Society in Later Medieval England* (1995), *Medicine for the Soul* (1999), *Leprosy in Medieval England* (2006) and *Urban Bodies: Communal Health in Late Medieval English Towns and Cities* (2013). As well as contributing to numerous academic publications, she has co-edited a two-volume history of Norwich (2004), a book of essays on medieval plague (2012) and another on environmental policing in pre-modern Europe (2019).

Charlotte Roberts, Ph.D., S.R.N., Fellow of the British Academy, is an Emeritus Professor of Archaeology at Durham University, UK. She is a bioarchaeologist, with a nursing background. She has studied and interpreted human remains from archaeological sites for the past thirty-five years. Her key research interests lie in contextual approaches to past human health (palaeopathology); ethics and human remains; contemporary health; evolutionary approaches to the origin and history of infectious diseases, including leprosy; and big-data projects in palaeopathology. She has published widely throughout her career, including a co-edited book on leprosy in 2002 (*The Past and Present of Leprosy*) and many book chapters and journal papers. Most recently she has authored/co-authored pieces in the *International Journal of Paleopathology* (2019), the

International Textbook of Leprosy (2018), and in L. Tilley and A. A. Schrenk (eds), *New Developments in the Bioarchaeology of Care* (2017). She has also authored *Human Remains in Archaeology: A Handbook* (2018) and co-authored *Health and Disease in Britain: From Prehistory to the Present Day* (2003), *The Bioarchaeology of Tuberculosis* (2003) and *The Archaeology of Disease* (2005). She co-edited *The Backbone of Europe: Health, Diet, Work and Violence over Two Millennia* (2018) and *A Global History of Paleopathology* (2012). Her monograph *Leprosy: Past and Present* was published in 2020 by the University Press of Florida.

Simon Roffey, Ph.D., is a Reader in Medieval Archaeology at the University of Winchester, UK. He was Co-Director of the recent University of Winchester training excavation of the *leprosarium* of Saint Mary Magdalen, Winchester. His publications include ‘Medieval leper hospitals in England: An archaeological perspective’, *Medieval Archaeology*, 56 (2012); ‘Charity and conquest: Leprosaria in early Norman England’, in D. M. Hadley and C. Dyer (eds), *The Archaeology of the Eleventh Century: Continuities and Transformations* (2017); and (with K. Tucker), ‘A contextual study of the medieval hospital and cemetery of St Mary Magdalen, Winchester, England’, *International Journal of Paleopathology*, 2(4) (2012). He also researches more widely on the archaeology of medieval religion and belief, and has published several books on this subject.

François-Olivier Touati, Ph.D., is Professor at the Université François Rabelais, Tours, France. He specialises in the history of medicine and health, and the relationship between the West and the East, in the Middle Ages. His publications include three books on medieval leprosy (1991, 1996 and 1998) and three edited volumes: one on the history of diseases and medical responses from origins to present times (1993), one on the archaeology and architecture of hospitals (2004), and another on measurement in medieval history (2013). In addition to many contributions to edited volumes, he recently published an essay on Ivo of Chartres and the revolution of medieval hospital care (2017) and an important article on the origins of the Faculty of Medicine in Montpellier (2018).

Magnus Vollset is an Associate Professor in History of Medicine and Researcher in History of Science at the University of Bergen, Norway. His Ph.D. thesis (2013) examined the transnational history of leprosy, 1840–1940, and his wider research interest is in how knowledge travels. Vollset has published books on the history of urban infrastructure (2007), meteorology (with Yngve Nilsen, 2016), dentistry (with Håkon Haugland, 2016) and geophysics (with Gunnar Ellingsen and Rune Hornnes, 2018). Vollset does not own a cat.

Kathleen Vongsathorn, D.Phil., is an Assistant Professor of Historical Studies at Southern Illinois University Edwardsville, USA. Her research interests encompass leprosy and other health-related topics in twentieth-century Uganda, and the history of leprosy in the British Empire. Her publications include ‘Discovering the “leper”: Shifting attitudes towards leprosy in twentieth-century Uganda’, in J. Reinartz and K. Siena (eds), *A Medical History of Skin: Scratching the Surface* (2013); and ‘Teaching, learning, and adapting emotions in Uganda’s child leprosy settlement, c. 1930–62’, in S. Olsen (ed.), *Childhood, Youth and Emotions in Modern History: National, Colonial and Global Perspectives* (2015).
