Note

I have found the Wikipedia sites on Set Theory and related issues to be useful, if unstable and unreliable. They have been utilised, but only so far as they might be before one has to journey into the generics, vagaries and eccentricities of set theory manifested in numerous zones across the net. Wiki sites are a form of netdeath before one even opens a link: now you see it, now you don't. Interesting, but dubious bibliographical use. Still, a rolling and sometimes participatory (even indirectly) recognition and acknowledgement needs to be made.
