Bibliography

For certain reviews, articles, interviews and other sources, internet versions, additional to the original hard copies, are cited to aid the reader. Others may originate on the web, and together with certain other sources they may not be paginated; this is indicated first by the absence of pagination in my text when sections are quoted and further it is appropriately indicated in entries below. Where it may prove useful, I cite the details of the original publication of a work later translated and reprinted in English or add the original publication date in square brackets.
